WORK EXPERIENCE

Benschop Singh & Charpenter, LLC (BSC)

Minneapolis, MN (Virtual)

Web Development Intern

Jul 2024 – Mar 2025

- Developed and maintained webpages using HTML, CSS, and JavaScript, ensuring a cohesive and visually appealing design aligned with BSC's aesthetic
- Collaborated with cross-functional teams utilizing Visual Studio, Bitbucket, Jira, MongoDB, Webflow, Relume to enhance the user experience
- Gained hands-on experience in UI/UX design by creating cohesive, visually appealing layouts aligned with the client's vision, while ensuring responsive and fluent designs across various devices and platforms.
- Reviewed website's and identified opportunities to enhance navigation to streamline user workflows, optimize page load speeds, and improve cross-device usability to boost user engagement.

Medtronic

Minneapolis, MN (Virtual)

Information Technology Admin Intern

Sep 2021 – Aug 2022

- Designed website to train Medtronic IT Professionals on the use of Medtronic medical devices and therapies
- Partnered with cross functional team to lead the development of Global IT Portfolio Operations (GPO) to manage Medtronic's IT Projects, Contracts, and Budgets divisions, totaling \$1.1B USD
- Communicated with stakeholders across IT organization to work with the Organization Change Management Team (OCM) in understanding how to use GPO
- Spearheaded the Stakeholder Dashboard utilizing Microsoft Excel to track stakeholder training, participation in governance of forums, and general interactions with GPO to reduce cost while improving the quality of IT services

PROJECTS

Password Manager Desktop Application

Team Project – Data Structures Course, Spring 2025

- GitHub: github.com/MalcolmTassah/Password-Manageger
- Implemented AES (Advanced Encryption Standard) encryption and decryption to securely store and retrieve user passwords
- Developed a secure login system with authentication and access control to protect sensitive information
- Built using C# and Windows Forms, connecting it to a SQL database for persistent storage
- Researched and applied best practices in cryptographic key management and secure data handling

SKILLS

Skills & Tools: C#, SQL, Python, HTML/CSS, JavaScript, Visual Studio, MongoDB, Bitbucket, Jira, Webflow, Relume, Microsoft 365 Suite

EDUCATION

Minnesota State University Mankato

Expected: **December 2027**

Bachelor of Science in Computer Information Technology

Relevant Coursework: Intro to Programming, Data Structures, Algorithms
